DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/06/2007 has been entered.

Remark

2. Claims 2 and 30 have been cancelled, and new claims 42-51 are added. Claims 1, 3-29, and 31-51 are pending for reconsideration.

Allowable Subject Matter

3. Claims 1, 3-29, and 31-51 have been allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 21, 41, 42, and 43, the closest prior arts of record issued to Milewski, Logan, Hayward (as in the previous final action) and recently to Katz et al (US Patent 7,103,906 B1) as well to McGee et al. (US Patent 7,143,353 B2) either alone or in a combination fails to teach or suggest the present invention for a system and its corresponding method for distributing

personalized editions of media programs, the system comprising: an editing device comprising a media interface component that accesses a first locally stored copy of a media program; a point of interest designation component that receives a designation of a plurality of points of interest within the media program; a bookmark generation component that generates a sequence of bookmarks defining a personalized path of skip-to points through the media program, each bookmark representing one of the designated point of interest within the media program, and a bookmark transmission component that transmits the sequence of bookmarks; and a playback device having access to a second locally stored copy of the media program, wherein the playback device receives the sequence of bookmarks directly from the bookmark transmission component of the editing device, and wherein the sequence of bookmarks is usable by the playback device to skip from one point of interest to another within the media program according to the sequence defined by the personalized path in response to a user command. Katz teaches to have bookmarking technique and to resume an interrupting program at a second device; however, the resuming is at the point where the interrupt occurs (Katz, Abstract and col. 4/lines 5-20). Katz does not teach to resume at the second point of a sequence of bookmark where the user can define a personalized path of skip-to points through the media program as in this invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
